

AKANKSHA DHOMANE

ESG Data & Product Analyst | Sustainable Investment | Quality Assurance (Vendor Data Integrity)

Mumbai, India | akankshadhomane26@gmail.com | +91 93734 45274 | [linkedin.com/in/akanksha-dhomane](https://www.linkedin.com/in/akanksha-dhomane)

PROFESSIONAL SUMMARY

ESG professional with 4+ years across leading rating agencies and ESG fintech, covering the full data lifecycle — research, ratings, data quality, regulatory reporting, and product. Specialist in vendor data integrity (MSCI, Sustainalytics, ISS), and translating client needs into product features. Owning QA for analytics platforms with a proven record of improving data accuracy, and supporting institutional clients.

CORE SKILLS

- › **Regulatory & Frameworks:** SFDR, PAI (Tables 1–3), TCFD, CDP, GRI
- › **ESG Data & Vendors:** MSCI ESG, Morningstar Sustainalytics, ISS, CDP; data validation, remediation & quality checks
- › **Product & QA:** UI/UX testing, feature scoping, manual calculation checks, bug triage, test scripts, Jira, Stably
- › **Tools & Technical:** Snowflake (data-quality checks), Power BI, Advanced Excel, MS Office, AI-assisted research tools
- › **Domain:** ESG ratings methodology, client & Level-2 support, Vendor Integrity (MSCI, ISS, Sustainalytics)

EDUCATION

Master of Management Studies (Finance) — Lala Lajpatrai Institute of Management, Mumbai 2020 -2022

Bachelor of Commerce (General) — BYK College of Commerce 2017 - 2020

PROFESSIONAL EXPERIENCE

ESG Product Analyst · Equity Data Science (EDS) Apr 2025 – June 2026

- › Drove SFDR reporting by ensuring the accurate generation and delivery of Principal Adverse Impact (PAI) Tables 1, 2 and 3 from vendor data, aligned to client requirements.
- › Partnered with vendors including MSCI and Sustainalytics, ISS to resolve discrepancies, validate calculations and optimize data feeds for client portfolios.
- › Defined the business logic and step-by-step processes that enabled engineering teams to automate backend updates for delayed vendor metric revisions.
- › Designed client alert systems that flag significant shifts in reporting metrics and allow drill-down to the specific security or issuer driving the change.
- › Owned UI/UX testing and manual calculation checks on the Stably platform, thoroughly validating new dashboard metrics before release.
- › Gathered feature requirements in client meetings, authored Jira tickets to guide the product roadmap, and acted as the primary Level-2 escalation point while contributing Help-Centre documentation.

QA Analyst (promoted from ESG Analyst) · SG Analytics Apr 2024 – Mar 2025

- › Audited and validated analyst-submitted ESG research feeding a proprietary AI research tool, ensuring only accurate, structured data entered the machine-learning loop.
- › Trained and optimized the AI model by conducting baseline research on complex ESG metrics, testing autonomous outputs and correcting learning gaps with detailed multi-company data.
- › Embedded custom search parameters, industry keywords and analytical logic to teach the system to identify intricate sustainability indicators autonomously.
- › Synthesized verified AI outputs and manual ESG research into high-fidelity reports and presentations for clients.

Research Associate — ESG Ratings · Morningstar Sustainalytics Feb 2022 – Oct 2023

- › Conducted ESG research evaluating the sustainability practices and product impacts of over 1,200 global companies across diverse sectors.
- › Produced in-depth ESG ratings by analyzing corporate disclosures including Annual Reports, CSR/Sustainability Reports, TCFD and CDP filings.
- › Assessed Environmental, Social and Governance performance covering carbon reduction, biodiversity and water management, labour standards and employee relations, and regulatory and policy compliance.
- › Maintained high data integrity by standardizing findings in a proprietary web-based tool and collaborating cross-functionally to ensure rating consistency.
